Sunday, and as a result Edmonton had another of its miraculous escapes from a devastating conflag-

shadowing horror a fortnight earlier, the world shadowing horror a fortnight earlier, the world would be shocked at the magnitude of this new disaster. In comparison it is insignificant. But existance with flat money. As Berlin is now prolipastic at the magnitude of this new disaster. In comparison it is insignificant. But it must add a large number to those who have been made destitute by the power of the elements. All the described in the properties of the comparison of the department of the comparison of the department of the properties of money and fuel to,France and Belgium, but its continue to the comparison of the compari

### IS DEFIANCE ALLOWABLE?

The Department of the Attorney-General will not appeal the decision of the court acquitting Mr. Trider of the murder of Constable Paris at Drumheller. Trider, it will be recalled, was the man who failed to stop his automobile when ordered to do so by provincial police officers. The car crash-ed through a fence and one of the officers was killed. So far as the public are aware arrays goes free of punishment. That he deserved the accusation of murder is to be doubted, but that he cught to be punished for refusing to obey the cught to be punished for surely plain enough. If orders of the police is surely plain enough. If hootleggers or speed fiends of other types do not have to stop when told to, and are not to be pen-alized even if they kill officers while defying orders, the prospect of law being enforced will be very decisively discounted. If the province will not protect its own agents they can hardly be expected to show zeal in the enforcement of its laws to the point of risking their lives.

to Fiume and try his hand at governing again. Fiume was formerly an Austrian port. Italy fought for it, and by all the rules of war should fought for it, and by all the rules of war should have got it. But the Jugo-Slavs objected, and it was set up as a "free sity," otherwise a no-man's town. As the countries adjacent are interested in building up their own ports they have naturally diverted all the traffic they could to its rivals, and Finne has suffered the fast that might be expected. It is a starved city. The Government has finally resigned, cheiffly because business is dead and a revival not in prospect. Italy has installed a military governor to prevent the community cinking into lawlessness, and also to gain the advantage of possession as an argument against the claims of Jugo-Slavia. The was-like poet was right so far as the inhabitants of the place were concerned. They would have fared better if the clip had been given to Italy when the territory taken from Austria was being portioned out, and the interests of peace might have also been better served. Jugo-Slavia would in that case have claimed and secured compensation cleawhere Fiume would have all the trade that a powerful country could pour through it, and the present strained relations between Rome and Belgräde could not have cocurred. Fiume is commercially like a city planted on a small island in the middle of the sea; it is to the advantage of every country which might make it prosperous to do its business through some other port. have got it. But the Jugo-Slavs objected, and it

THE TROUBLES OF WILLIAM

Mr. Sherman seems to be having about as much trouble to keep the Drumheller mines operating as he had last wrister trying to shut down the mines are made Edmonton. The Drumheller and stayed on strike in defiance of their agreement, and have stayed on strike in defiance of official orders to go back to work. Lately William has been cancelling their charters and threatening to set up new tools composed of the minority who want to dig coal. The net result of his year's activities is that the Edmonton mines are producing while the Drumheller mines are not. The Drumheller operators might find it profitable to follow the lead of the Edmonton contemporaries, relieve William of his responsibilities, and run their ewn outside the contemporaries and the relieve William of his responsibilities, and run their ewn outside the contemporaries. mines for a while

Those financial geniuses who want the Doman-ion Government to save the country and make everybody rich by issuing flat money ought to be happy. If opulence is to be attained in that way there is no need to wait until the printing press is started at Ottawa. All the discoverer of the sup started at Ottawa. All the discoverer of the sup-posed short-cut to wealth has to do is to invest ten dollars or so in a ship-load of German paper marks. They are fait money and precisely as valu-able and negotiable as though they were turned out at the Federal printing burean and decorated with a picture of the Governor General. But it is, too reported that Canadian economists of the rag money type are placing any large orders for that kind of currency in New York. Emphatically not. Fixt money is all right to talk about, but, when it comes to parting with a real Canadian ANOTHER ESCAPE.

A boy, it is said, touched a match to a wisp of hay sticking out of the window of a feed barn on the said.

its miraculous escapes from a devastating conflag-ration Three morals are apparent. Matches output to be kept away from boys, property in this wood-built city kept well insured, and the fire brigade kept strictly up to the mark.

THE OTHER SIDE.

Berlin calculates that France and Belgium have only managed to ship out 2,377,000 tons, tons concept and being the corresponding period kept strictly up to the mark. ANOTHER DISASTER.

Five thousand people are said to have perished in floods which destroyed many Japanese towns and villages at the week-end. But for the over-the destroyed many Japanese towns and villages at the week-end. But for the over-the destroyed many Japanese towns the people of the peop

# Again the Suggestion that this is a Good Time to Put In Your Gas Service Connections

We feel like apologizing for again calling your attention to the fact that there is going to be a big rush for gas services about the time our big trunk line is completed between Edmonton and Viking, and the natural gas turned into the city system.

The date when that takes place is not far distant. Perfect fall weather, plenty of men, plenty of supplies, no delays for ma-terials, and other working contingencies, are bringing that time measurably near.

Large numbers of Edmonton people have acted wisely, and have their services installed and ready for the gas—getting a good job done while the weather conditions were favorable.

Some others are waiting until they see the gas actually in the system before signing up applications or having services installed.

While the weather is right for outdoor work we will continue putting in services at the present rates. When had weather comes and the ground freezes up (and it will freeze this season) you cannot expect to get your work done at the present rates.

When the gas is turned in we expect to be busy. Everybody ill want something done at once, and of course there may be

There is a limit to what our men and the city plumbers can do

in a given time.

We don't want our customers disappointed, so we again auggest that in these bright fall days is a good time to do your outside work, while workmen can work to advantage.

OUR TERMS ON THIS WORK, ASKING NO PAYMENT UNTIL 20 DAYS AFTER THE GAS IS TURNED ON, MAKE THE FINANCIAL PART OF IT EASY FOR YOU. IF YOU WANT TO PAY CASH WE WILL GIVE YOU A TEN PER CENT. DISCOUNT IF THE ACCOUNT IS PAID WITHIN 20 DAYS OF THE DATE OF THE INVOICE. IF YOU WANT TIME ON THIS WORK WE WILL SPREAD THE PAYMENTS OVER SIX MONTHS, EQUAL INSTALLMENTS, AND CHARGING NO INTEREST ON THE TIME PAYMENTS.

If you want any information, or a figure on this work, call up.

If you want any information, or a figure on this work, call up either of our offices, and a courteous representative will go out and give you quotations. But remember—Right now is a good time.
